Using Math to Juggle? - Juggling Experiments | HowStuffWorks Another application of mathematics with juggling is site-swapping.Site-swapping is a form of notation that describes a juggling pattern. Jugglers write site-swaps as a series of numerals representing how many beats each toss will take from throw to catch, which translates into how high each throw must be made in the pattern.

The Mathematics of Juggling One useful method that many jugglers rely on to summarize patterns is site-swap notation, an idea invented independently around 1985 by Paul Klimek of the University of California at Santa Cruz, Bruce Tiemann of the California Institute of Technology and Michael Day of the University of Cambridge. Site swaps are a compact notation representing the order in which props are thrown and caught in each cycle of the juggle, assuming throws happen on beats that are equally spaced in time. Digit Juggler Decimal Subtraction #1 - Education.com Digit Juggler Decimal Subtraction #2 Worksheet On this worksheet, kids are given a list of numbers and they need to plug them into the right spot in the decimal subtraction problem.
